Professional Summary

IT Engineering Specialist with over 4 years of experience in Itaú Unibanco's credit card ecosystem, focused on the bank's corporate and business banking clients. Deep business knowledge of payments and credit products, having worked across reconciliation with the Mastercard and Visa card networks, payment journeys, debt renegotiation products, card onboarding, and transaction authorization. Currently leads technical workstreams on a strategic modernization initiative, migrating customers from a legacy mainframe platform to a new card platform. Combines financial-industry business acumen with strong backend development experience, distributed systems, and technical team leadership.

Work Experience

Itaú Unibanco — São Paulo, Brazil

IT Engineering Specialist

Feb 2026 – Present

- Works cross-functionally across the Corporate Cards organization, connecting teams, products, and journeys to support technical decisions and resolve complex problems.
- Owns technical workstreams for the customer payment journeys — statement, direct debit, boleto, Pix, and debt portability — and for debt renegotiation and installment products.
- Works across the customer's card onboarding journey — onboarding, application, issuance, and virtual card — including identifying and resolving critical issues.
- Investigates and resolves issues related to credit limits and transaction authorization, ensuring the integrity of approval decisions.
- Leads technical workstreams on a strategic customer migration project from a legacy mainframe platform to a new modernized card platform, ensuring financial data integrity and continuity of the customer experience.

Senior IT Engineering Analyst / Tech Lead

Feb 2025 – Jan 2026

- Worked on card reconciliation and settlement with the Mastercard and Visa card networks, building deep insight into the financial and operational processes of the card ecosystem.
- Implemented system reliability practices, reducing average incident resolution time by 40%.
- Automated software deployment processes, cutting delivery time by 70% and improving consistency across environments.
- Reduced AWS cloud infrastructure costs by 25%.
- Led the response to critical production incidents, conducting root-cause analysis and implementing permanent fixes.
- Worked closely with Product Owners and Business Analysts and provided technical mentorship to other engineers.

Mid-Level IT Engineering Analyst

Jul 2022 – Jan 2025

- Developed automation tools for extracting and integrating data between legacy mainframe systems and the AWS cloud, eliminating manual processes.
- Deployed cloud infrastructure using automated, infrastructure-as-code practices.
- Developed real-time data processing services for internal systems.
- Built web applications to visualize relationships between legacy systems, supporting impact and dependency analysis.
- Implemented performance testing and data pipeline monitoring, improving process reliability.

Junior IT Engineering Analyst

Oct 2021 – Jul 2022

- Automated operational processes on legacy mainframe systems, improving the efficiency of critical routines.
 - Developed simulation and testing tools to validate integrations between legacy systems and the cloud.
 - Built monitoring dashboards and log analysis tools to speed up issue detection.
 - Developed an internal platform for secure script execution with corporate authentication.
-

Pirelli — Campinas, Brazil

Project and Automation Engineer

Feb 2021 – Oct 2021

- Reduced production line downtime through the automation of industrial processes.
- Coordinated automation projects from design through deployment.

Electrical Engineering Intern

Jan 2019 – Dec 2020

- Supported automation projects and electrical systems testing.
-

Education

State University of Campinas — Campinas, São Paulo, Brazil

Bachelor of Engineering in Electrical and Electronic Engineering

2016 – 2020

Certifications

- AWS Certified Cloud Practitioner — Amazon Web Services, 2023
 - Generative AI with Large Language Models — Coursera, 2024
 - Building Cloud Computing Solutions at Scale Specialization — Duke University, 2024
 - Cloud Machine Learning Engineering and MLOps — Duke University, 2024
 - Cloud Data Engineering — Duke University, 2024
 - Cloud Virtualization, Containers, and APIs — Duke University, 2024
 - Spark, Hadoop, and Snowflake for Data Engineering — Duke University, 2024
 - Object-Oriented Programming in Python — Duke University, 2024
 - Mainframe Specialist Certifications — Interskill Learning, 2022
-

Technical Skills

Languages & Frameworks: Kotlin, Python, Java, JavaScript, TypeScript, Angular, Node.js

Cloud & Infrastructure: AWS — Lambda, S3, RDS, EC2, ECS/EKS, and API Gateway; Terraform, Docker, Kubernetes, CI/CD

Data & Integration: PostgreSQL, Amazon Neptune, MongoDB, Mainframe DB2, ETL Data Pipelines

Reliability & Observability: SRE Practices, Datadog, OpenTelemetry, Monitoring

Business Domain: Payments, Credit Cards, Card Network Reconciliation with Mastercard and Visa, Transaction Authorization, Credit Products & Debt Renegotiation, Legacy System Migration

Languages

Portuguese (Native) | English (Advanced reading, writing, and listening comprehension; intermediate spoken fluency, actively improving)
